Analysis of Table 2.7

Whilst the availability of all types of tourist accommodation in Western Australia has increased steadily over the last few years, there has been substantial growth in the numbers of Holiday Flats, Units and Houses available for letting. This is well indicated by increases of 5.1% in 1991-92 and 5.2% in 1992-93. The Tourism Industry has continued to meet this demand for self catering, self contained accommodation in 1993-94 resulting in an increase of 11.6% to 2,224 units as at 30th June 1994.

Analysis of Table 6.4

When compared with the previous year, coal production in 1993-94 fell by 5.4 per cent to 5,151,000 tonnes. All of this shortfall occurred in the last quarter of the year and was caused by the undertaking of a major economic rationalisation process by coal producers. A general move away from underground mining was the major consequence of this rationalisation.

Reduced production continued into July and August 1994 but the August figure came to within 40,000 tonnes of the August 1993 total, indicating that the industry is closing the gap by improving production from non-underground sources.

Analysis of Table 6.7

During the June Quarter, the value of Gold production rose by 5.5 per cent and that of Iron Ore by 15.2 per cent when compared with the March Quarter. Notable production increases in 1993-94 were Gold by 7.9 per cent to 193.8 tonnes, nickel 13.1 per cent to 61,000 tonnes and Iron ore by 7.1 per cent to 119.7 million tonnes.

Analysis of Table 8.2

In original terms, new motor vehicle registrations for July 1994 totalled 4,883 and represented a decrease of 22.9 per cent compared with June 1994. This decline in registrations for July follows the large upsurge in registrations during June, particularly in the other vehicles category. The trend estimate, however, continued to rise, up 1.3 per cent from June to July. *For more information about this table, contact Ian Mackley on (09) 360 5242*
